FUN FACTS

Milky Way is a candy bar and also a galaxy.

The Milky Way galaxy contains the Earth and its solar system.

Mars has the solar system's biggest volcano, Olympus Mons, at 13.6 miles high and 370 miles wide.

Black holes aren't actually black.

A full NASA space suit costs a cool \$12 million!

The sun is a star, just one of billions in our galaxy.

Saturn's rings are made up of chunks of ice and rock.

The planet Jupiter is made from gas.

All of the planets are named after Roman and Greek gods/goddesses, except Earth, which means 'ground.'

Venus is the second brightest object in the night sky, after the moon.

In 1947, fruit flies were launched into space to study their reaction to space travel.

Astronauts aboard the ISS see the sun rise and set every 90 minutes.
